NOTES

* For an authentic look, each color option is composed of a variety of darker & lighter tones. Natural ingredients such as granite are present within the recipe to allow for a range in tones, veining and textures from one stone to another.

See page 96 to 116 for more technical information.

The dimensional tolerance for Stonedge wet cast retaining wall units is: $\pm \frac{3}{16}$ " (5 mm) for height and $\pm \frac{1}{2}$ " (13 mm) for length and width. During the installation, the level between adjacent wall units will vary (usually more than for a dry cast wall unit) in order to obtain a more realistic appearance of a natural stone wall.

- A. RÖCKA DOUBLE-SIDED WALL UNITS SECURE EACH ROW WITH CONCRETE ADHESIVE
- B. EMBEDMENT DEPTH, 6" (150 mm) MIN.
- C. 24" (612 mm) MAX.
- D. GEOTEXTILE

90° CORNER OF A DOUBLE-SIDED WALL

1. Alternate odd and even rows
2. Stagger vertical joints by at least $\frac{1}{4}$ of the length of the block.
3. Glue all modules at each row with a concrete adhesive.
4. It is possible to alternate the blocks (A, B or C) in the same row to create different patterns.

DOUBLE-SIDED WALL - END OF A STRAIGHT WALL

* It is possible to alternate the blocks (A, B or C) in the same row to create different patterns. However, a minimum distance of $\frac{1}{4}$ the length of the block is required between the vertical joints.
