

RINOX

Masonry & Alternative Masonry *Collection*

Inspired by *nature*, art and what surrounds us

Timeless, elegant and refined, Rinox bricks and stones are distinctive due to their natural colors and quality design. In choosing masonry products, you will increase the attractiveness of your property.

A local *family* business

Rinox's success is largely due to the innovation and creativity demonstrated by its founders, Horacio Correia and Rosa Ciccarello. They have anchored the importance of family within their company. Today, their four children proudly participate in the success of the family business.

In addition, they are proud to continue their growth in their various activities within the Rinox Group, now counting 4 divisions, 5 manufacturing plants and more than 100 distribution centers. They would also like to salute the expertise and remarkable loyalty of their collaborators over the years.

Thank you for being part of the big Rinox family.

Innovation and *distinction*

Rinox is a manufacturer of high-end, high-performance and prestigious concrete products for over 25 years. Three collections are offered: Landscaping, Masonry and Alternative Masonry. From the facade to the exterior design of a residential or commercial project, Rinox is your ally in terms of trend and quality in your construction project.

MADE HERE

Rinox products are made locally. We offer cutting-edge concrete products whose components are stable and calibrated to perfection. Our aggregates come from a single location, which allows us to have precise and consistent formulas for each of our colors offered.

All of our products meet industry standards

STYLES

Recognized for its avant-garde products, Rinox has made it its mission to consistently and accurately respond to constantly changing market trends. Its natural stone-like products are undoubtedly the most remarkable and the most appreciated by customers.

30 PATENTS

Rinox has developed several unique and innovative products with patents. Inventions that facilitate installation and allow customers to have exclusive and superior products.

TECHNOLOGY

RinoXtrem technology enables the production of exceptionally durable and ultra-vibrant, color-fade resistant products. A unique technology that stands out in the industry because the color is found throughout and within the product.

Our products are designed in a meticulously controlled environment. We carefully observe humidity and density levels and rigorously analyze all factors surrounding the production process. The integrity of our colors is due to the perfect blend of quality control and the high performance of our state-of-the-art equipment.

Resource center

What type of customer are you ?

On our Rinox Website you can find all the information you need to help you with your projects! Design advice, catalogs and technical sheets; several tools are available for you.

DISCOVER OUR RESOURCE CENTER:

New redesigned *Website*

A few months after its 25th-anniversary, Rinox released a new Website with a new brand image. The new Web platform is optimized to create an intuitive customer experience.

To reflect the continuous evolution of the company, Rinox has completely redesigned and refreshed the look for a better user experience. The ultimate goal of this new Website is to guide the user in their needs or desires, as a professional or homeowner, through practical and intuitive navigation.

What to know before starting a project?

Planning a home construction or renovation project is a major undertaking that requires careful preparation. Although many homeowners choose to hire professionals, certain details and choices can

be considered before the process even begins. As a homeowner, here are the steps to follow before committing to your exterior siding project!

FIND INSPIRATION

Similar to interior design, the exterior facade must follow the overall architectural style of the house to create visual and aesthetic harmony. To make this process easier, we encourage you to explore our Lookbook. Whether you're drawn to classic, contemporary, or traditional style, our Lookbook features a variety of projects that will help you identify the style that best suits your preferences.

CHOICE OF MATERIALS

Stone, brick or aluminum siding are timeless options offering a sophisticated look. To clearly visualize the texture and color of your favorite product, visit the product page to see its virtual sample.

CREATING A 3D PLAN

The key to a successful project lies in the creation of a 3D plan drawn up by a professional. We understand the importance of providing architects and designers with the best tools to bring their vision to life. Recognized as some of the most realistic on the market, these textures are the essential element that will transform your plan into an impressive visual representation.

UNIFORMITY & TIMELESSNESS

The continuity from the exterior siding to the interior of a house represents much more than a simple aesthetic touch. It is a harmonious fusion between the exterior environment and interior spaces, creating an atmosphere of cohesion and unity. The judicious use of materials and patterns ensures a seamless transition, where the

exterior is elegantly reflected inside, providing an exceptional visual and tactile experience. This clever integration helps create a welcoming and unique ambiance, where every detail is carefully considered to evoke a true connection between nature and the comfort of your home.

Linea System

An *innovative* system

After extensive research, Rinox designed and patented an avant-garde system that facilitates thin veneer installation.

Each piece is manufactured with spacers. The spacers allow for the creation of joints with a naturally constant width, without having to use other techniques normally used to maintain a uniform space between the stones.

The spacers must be installed one on the other in order to have the exact measure needed to create the joints.
